

Calling Associates of Manchester Plant!

Manchester Plant is starting a very exciting project! We are delving into the archives to look for photos, documents and memories to build a very detailed timeline of the site. We are working with a graphic designer who will pull together all the material they can find on the history of site and use these to create big boards, one per decade, to be displayed on site for employees and visitors to enjoy.

We need your help:

1. Whilst you are up in lofts putting back the Christmas decorations this Christmas please have a look for any **old photographs of people/work/site, any old site newsletters/company news**.
2. If you have a particular memory you think would help us build a picture of the site please write it in an email to Georgie Crotty (crotty.g@pg.com) or call her on 0161 875 6949
3. The graphic designer is coming to Manchester Plant in the New Year and would like to meet with a few employees and associates who have a good memory of the site and a passion for its history. He would like to spend an afternoon hearing stories and sharing experiences with this group to try and grasp a much clearer understanding of the site – if you are interested, please do let Georgie know.

We are spreading the message about this project mainly through word of mouth so please help us get the message out there!

Georgie Crotty (crotty.g@pg.com) is leading this project on site, please send all material to her and get in touch if you have any questions.

Thank you!
